# WhereScape®

# WHERESCAPE RED FOR MICROSOFT SQL SERVER

*Experience agile data warehouse development for Microsoft® SQL Server™ with WhereScape's data warehouse automation solution. WhereScape RED is an end-to-end, data warehouse development environment optimized for Microsoft SQL Server, including support for SQL Server Integration Services (SSIS) and SQL Server Analysis Services (SSAS).*

Using WhereScape RED, you can build SQL Server-based data warehouses in weeks compared to months or years – with fewer resources, no missed deadlines, and lower costs. More than 400 SQL Server customers in a broad range of industries worldwide utilize WhereScape RED to realize business value far more rapidly and at a dramatically lower total cost of ownership.

## Deliver Value Quickly with WhereScape RED for SQL Server

- Radically reduce data warehouse development time

- Eliminate hand coding and improve quality and performance

- Slash software licensing and consulting costs

- Improve transparency

- Mitigate risk with greater agility and adaptability

# WhereScape®

*"Our results using WhereScape have been extremely impressive. WhereScape RED enabled us to design, develop, document and deploy a production-ready, SQL-Server-based reporting solution in eight weeks that solved a critical and immediate business need. Using traditional data warehouse development methods would have taken us six to eight months."*

*Ryan Fenner, VP, Data Solutions Architect, Union Bank*

## Quicker Time-to-Value

A Microsoft Gold Partner, WhereScape will help you dramati-cally accelerate time-to-value for your SQL Server projects, enabling you to move to an agile, iterative development approach. WhereScape RED eliminates hand coding by automatically generating SSIS packages to load data, DDL, and stored procedures in native T-SQL, as well as documenta-tion. For SSAS, WhereScape RED automatically generates cubes and corresponding documentation for online analytical processing and data mining.

## Greater Agility, Lower Costs

WhereScape RED's drag-and-drop visual design environment is easy to use for building, optimizing, and changing your data warehouse, enabling your company to gain the agility to better adapt and respond to changes in the marketplace – and stay far ahead of your competition. By eliminating complex hand coding and automating SQL Server develop-ment, WhereScape RED dramatically lowers your development costs and frees up resources for other high-value projects.

## No Compromises

WhereScape RED delivers quick results, incorpor-ating best practices from Microsoft and years of data warehouse experience to ensure a world-class result regardless of the experience level of your team. Generating code that scales to the limits of the platform, WhereScape RED provides the flexibility and scalability to handle the most complex integration and business rule challenges.

## Optimize Your Data Warehouse Investment Today

Let WhereScape RED empower your data ware-house development team to deliver measurable value to the business in the shortest amount of time, at the lowest total cost of ownership and highest return on investment.
