

Where to Take Control of Big Data? WhereScape.

WhereScape accelerates data infrastructure projects for IT organizations of all sizes worldwide by automating the design, development, deployment, and operation processes. Over 1,200 customers use WhereScape to eliminate manual coding and reduce project timelines from months or years to days or weeks.

Solution Benefits

- ▶ Boost Developer Productivity
- ▶ Take Control of Your Data
- ▶ Scalability and Traceability

WhereScape RED

Effortlessly scale and automate data infrastructure for instant data extraction and loading into target repositories, enabling real-time environment interaction and construction.

ROI: Improve development time by 40%.

40%

WhereScape 3D

An essential modeling tool for automated data infrastructure and integration, enabling rapid development, deployment, and documentation on-premises or in the cloud with our integrated tool.

ROI: Enhance time-to-value and achieve cost savings up to 10 times faster.

10x

WhereScape Data Vault Express

Simplify data vault development processes, automate the entire lifecycle, and deliver innovative solutions faster, more cost-effectively, and with significantly reduced risk.

ROI: Achieve a 50% reduction in the integration time for new business data.

50%

1,200+

Proven = Trusted

1,200+ customers from small organizations to large global enterprises

75%

Real ROI

Reduce project costs up to 75% by automating the routine steps and documentation that slow developers down.

21+

Experienced

21+ years of automation innovations for IT teams of all sizes.

“WhereScape delivered in three weeks what we estimate would have taken several months using a traditional approach with hand crafted code.”

David Rutherford, Head of Application and Data Architecture, Smith & Williamson

Boost Developer Productivity

WhereScape streamlines coding by 95%, ensuring efficient code generation for faster project development and modification. It guarantees first-time success with various languages like Python, P-SQL, SnowSQL, Spark SQL, and Powershell, reducing testing time and accelerating data project refinements.

Take Control of Your Data

Data trust and documentation are crucial. WhereScape provides answers through generated documentation, reports, and graphics. Future vendor migration is seamless due to captured metadata. You own the data, not the other way around.

Scale and Traceability

Simplify tasks like adopting new data sources, enhancing data governance, and ensuring data quality with WhereScape. Our tool automates code generation for optimal performance and reduces manual coding variances. **Improve scale and traceability by 75%.**
